**Image Uploader Extension User Guide**

# Content

# Product Image Upload

Images And Videos

150x150 px, 5 KB

Base    Small

1. **Navigate to Products**:

   Go to **Catalog > Products** in your Magento admin panel.

2. **Select a Product**:

   Click on the product you want to edit or create a new product.

3. **Upload Images**:

   In the **Images and Videos** section, click the upload button and select your SVG or WEBP file.
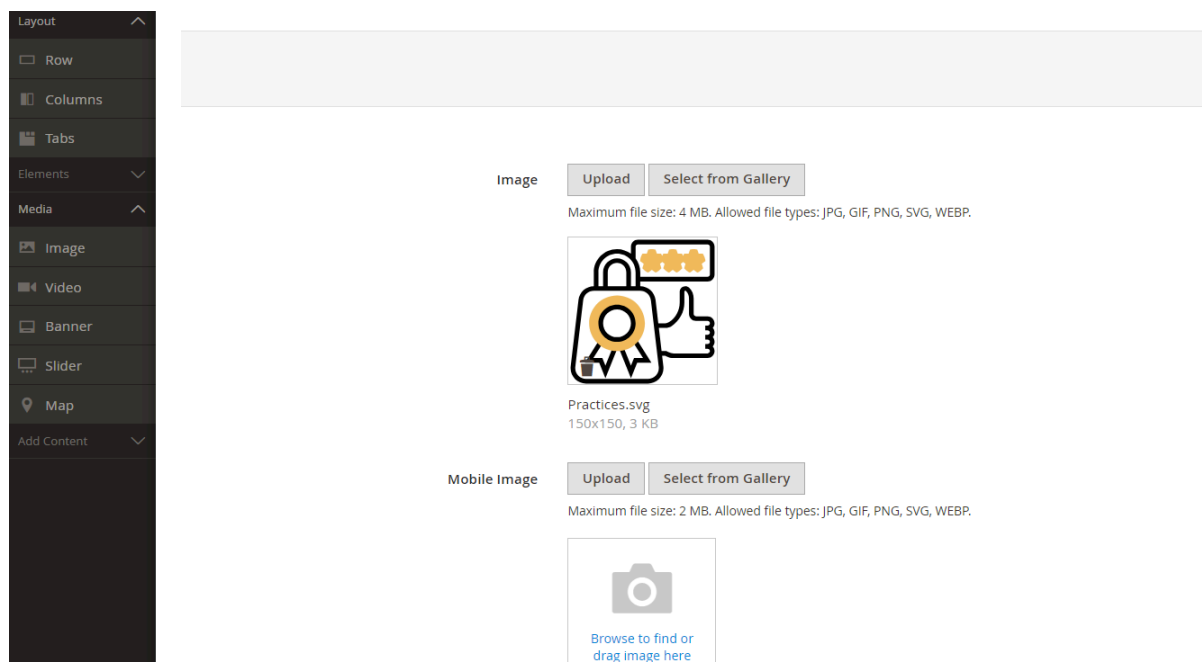

4. **Save Changes**:

   After uploading, make sure to save the product to apply changes.

# Category Image Upload

1. **Navigate to Categories**:

   Go to **Catalog > Categories**.

2. **Select a Category**:

   Click on the category you want to edit.

3. **Upload Image**:

   In the **Category Image** section, click the upload button and select your SVG or WEBP file.

4. **Save Changes**:

   After uploading, save the category to apply changes.

# PageBuilder Image Upload

**Navigate to PageBuilder**:

Access **Content > Pages** or **Content > Blocks** and open the PageBuilder editor.

**Add Images**:

Drag and drop or click the upload button to add SVG or WEBP files directly into your content.
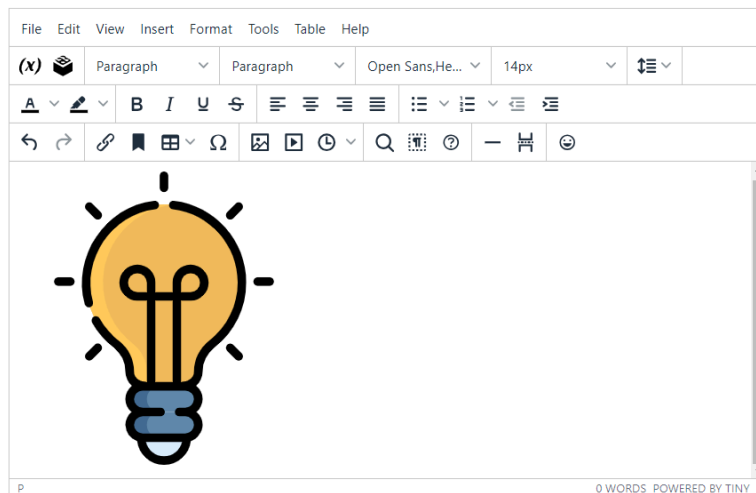

**Save Changes**:

Save the page or block to apply the uploaded images.

# Wysiwyg Editor Upload

**Navigate to Wysiwyg Editor**:

Open a content page or block where the Wysiwyg editor is available.

**Upload Images**:

Click on the upload button in the editor to select and upload your SVG or WEBP files.

**Save Changes**:

After uploading, save the content to apply the changes.

# Theme Logo and Favicon Upload

**Navigate to Theme Settings**:

Go to **Content > Design > Configuration**.

**Select Your Theme**:

Click on the theme you want to configure.

**Upload Logo and Favicon**:

In the **Logo** and **Favicon** sections, click the upload button and select your SVG or WEBP files.

**Save Changes**:

Save the configuration to apply your logo and favicon.

## Supported Formats

The ImageUploader extension supports the following image formats:

- **SVG**: Ideal for scalable graphics such as logos and icons.
- **WEBP**: Provides superior compression and quality for web images

## Troubleshooting

If you encounter issues while using the ImageUploader extension, consider the following steps:

- **Check File Format**: Ensure the uploaded files are valid SVG or WEBP formats.
- **File Size Limitations**: Verify that your server settings allow for the upload of larger files if necessary.
- **Clear Cache**: After uploading images, clear the Magento cache to see updates reflected on the frontend.
